

Eyewear Cleaning and Care

Guidelines:

1. Assure lenses are free of dust and debris before cleaning.
2. Avoid using harsh chemicals and abrasive materials.
3. Use lens cleaning wipes or mild soap and water to clean lenses, nose-pads, and padded temple-ends.
4. If using soap, rinse with clean water and pat dry with a soft, lint-free cloth.
5. Do not store eyewear in areas with extreme temperatures, such as vehicle dashboards. Polycarbonate and TPR materials have melting points and can break down.
6. To avoid scratching, keep from resting eyewear on lenses.
7. Regularly inspect for damage and replace as necessary.

Pre-Moistened Lens Cleaning Towelettes Dispenser

- 100 towelettes per dispenser, 10 dispensers per case

Item: BHLC21

Lint-Free Microfiber Fabric Pouch

- Exceptionally fine lint-free microfiber fabric pouch helps protect glasses from scratches while not in use
- Drawstring closure helps prevent glasses from accidental loss

Item: BHMB

Lint-Free Microfiber Cloth

Item: BHMC
