

# CUSTOM LOGO IMPRINTING

Imprinting areas vary per safety glass model

## ARTWORK GUIDELINES

A vector based format is preferred. This includes .ai and .eps, or .pdf with editing capabilities. If a vector file can not be provided, a high resolution pixel based format (.eps, .tif, .psd, .jpeg, .png) is acceptable. Additional fees may apply to process logos.

Depending on the orientation of your logo it may not be able to fill the entire imprint area due to the curvature of the lens or the height of the temple. Our imprinting professional will configure your provided artwork on the lens or temple to ensure optimal sizing and a proof will be provided for you.

## STOCK COLORS AVAILABLE

Choose one to two colors from our stock offering. If your desired color/colors are not a stock color, please include the PMS (Pantone Matching System) color values with your logo for accuracy purposes. If PMS values are not provided the closest color will be chosen. Keep in mind, this leaves room for minor variances in color. Special colors add an additional cost. Please allow a minimum of 15 business days lead time per order after proof has been approved.

## HALF-FRAME:

Imprinted on the right-side temple and right or left lens.

Left Lens

### HALF-FRAME STYLES INCLUDE:
